---

Sparkfun is an exciting Colorado-based company that supplies a new wave of creative inventors with electronic components found in advanced devices such as the iPad. Sparkfun makes it easy to add accelerometers, gps, cameras, magnetometers, and stress sensors to do-it-yourself (DIY) projects.

In this hands-on workshop, we will learn more about the new Maker Faire phenomenon that is sweeping the nation. A short presentation will be followed with a hands-on project. Each participant will receive a Sparkfun Lilipad eTextiles starter kit. We will use conductive thread to sew lights, switches, and button cell batteries to a supplied piece of cloth or any piece of clothing you’d like to bring!
